HINTS ON THE CULTIVATION OF FLOWERING BULBS.

The Soil.

Any good well-worked soil will grow Bulbs, provided it is well-drained and broken up. Sandy loam suits them well, and even white sand, if well enriched, will grow them, but strong, stiff soils must be thoroughly well broken up, drained if necessary, and lightened by the addition of sand or vegetable matter before they are suitable; and a green crop grown on the land after its preparation, and dug in, would greatly help it into a proper condition for Bulbs.

Preparation of the Soil.

When land has been deeply dug for the reception of Bulbs, it should be allowed to remain unplanted for a week or two to allow it to settle, otherwise the Bulbs may get too deep down in the soil.

Avoid Deep Planting.

The size of the bulb must be taken into consideration when planting, and if a covering of soil equal to the diameter measure of the Bulb is given, it will generally be sufficient. A Hyacinth Bulb, measuring 2 inches in diameter, requires a covering of 2 inches only, but for late plantings of Gladioli we recommend that the depth should be increased, so that the Bulbs may escape the surface heat of summer.

Mulching.

A top dressing of old stable manure or decayed vegetable matter placed over the surface of the soil, to a depth of about two inches, is invaluable for Gladioli or Lilliums, &c., during the summer months, as it keeps the roots cool and retains the moisture in the soil. It is not necessary, however, for Spring flowering Bulbs—for these the soil should be kept open with a hoe or cultivator.

Manuring.

Nearly all Flowering Bulbs dislike ammonia, and fresh stable manure or fowl yard manure must never be used. Well rotted stable manure or cow dung, which has been maturing, can be safely used, but it should be well dug in, and not allowed to come in touch with the Bulbs. In the case of Daffodils, the manure is intended to hold the moisture like a sponge, and is not applied as a fertilizer. A dressing of bone dust may also be given with advantage when planting any of the Bulbs. It should be well mixed with the soil.

The Best Time to Plant Bulbs.

All the Bulbs we list can be safely planted during March, April and May, with the following exceptions:—Lilliums should be planted during May, June and July; Gladioli from April until October, and later if Bulbs are obtainable; and Montbretias, Tigridias and Vallotta Purpurea during June and July.

How to Plant Bulbs.

Bulbs may be planted in groups, beds or rows, and the distance apart must be determined by the size of the plants when grown. The soil must never be very wet or sticky when planting is done, and unless it has settled after digging the soil should be firmed with pressure of the foot, so as to give the Bulbs a firm base. If the soil is inclined to be stiff, a little sand under the Bulbs greatly helps drainage and prevents rotting. For special directions for the cultivation of Hyacinths in water, see page 2

Anemones.

- Dutch Single.** Mixed. All colours; a splendid assortment; very effective .. 1s. doz.; 5s. 100
- Dutch Double.** Mixed. Including many brilliant shades of colour .. 1s. doz.; 5s. 100
- Dutch Single Scarlet.** Very showy .. 1s. doz
- Dutch Double Scarlet.** Brilliant and very double .. 1s. doz
- French Single.** Mixed. Beautiful shades of colour; very large and showy .. 1s. doz
- The Bride.** Single variety. Beautiful pure white; flowers very freely .. 1s. doz
- Chrysanthemum-Flowered.** Mixed. A very distinct class, with large handsome double flowers; the petals are regularly incurved .. 1s. 6d. doz
- St. Brigid.** A beautiful strain of the Chrysanthemum-flowered Anemones, with double and semi-double flowers of the most brilliant colours .. 2s. doz
- Fulgens (Scarlet Windflower).** Dazzling scarlet; light elegant growth .. 2s. 6d. doz
- Fulgens fl. pl.** Double variety of the handsome Scarlet Windflower .. 2s. 6d. doz
- Double Named and Distinct Varieties** .. 2s. doz

Amaryllis.

- A. Vittata (Hippeastrum).** Hybrids. These produce flower stems from eighteen inches to two feet, surmounted by remarkably handsome large heads of trumpet-shaped flowers of easy culture; fine border plants .. 1s. each
- A. Kermesimum.** Terra-cotta .. 1s. each
- A. Formosissima (Sprekelia).** The Jacobean Lily. Showy bulbous plant, with beautiful brilliant crimson flowers; a very handsome border plant .. 1s. each
- A. Belladonna.** This well-known and splendid species is very variable, both in size and colour of the flowers, frequently producing variously shaded flowers, from almost white to reddish or purplish hue; they thrive best in light soil .. 6d. each

Babiana.

2d. each; 1s. 6d. doz.

BLUE, and Shades of Blue.

DWARF—Beautiful Blue and Shades of same.

Very showy plants, producing rich self-colours and very distinct hues in the same flower, with long wire-like foliage. To succeed with them they should be planted in a light sandy compost, with a small proportion of well-decayed manure.

Chlidanthus Fragrans (Fragrant).

A very pretty bulbous plant, the leaves appearing after the flowers, which are a bright yellow; easily grown.

Price 6d. each; 5s. per doz.

Crocus.

Best suited to the cool districts.

- | | | | |
|-----------------------|--------------|------------------|-------------|
| Blue | 2s. 6d. doz. | Yellow | 2s. doz |
| White | 2s. doz. | Striped | 2s. 6d. doz |
| Mixed Colours | | 2s. 6d. per doz. | |

Old English favourite, but only suitable to the colder districts. If the situation and climate are suitable no special care is necessary; will thrive in poorest soils.

Freesia.

A great favourite.

These flowers have a delicious perfume, and are of great value for cutting; each bulb bears more than one stem with eight or ten flowers. Most desirable pot plants, but they are perfectly hardy out of doors; should be planted four inches apart, and lightly covered; from 5 to 8 inches high.

- Refracta Alba.** White; sweet-scented; very fine .. 6d. doz.; 3s. 100
- Leichtlini.** White, passing to primrose; yellow throat, pretty .. 1s. doz.; 5s. 100

ANEMONES are deserving of a place in every garden, and we cannot too highly recommend them. Their matchless variety of colour, and endless shades of crimson, scarlet, lilac, rose, blue, purple and white, together with the wonderful markings and blotches of colour, renders them very attractive. They are most beautiful as cut flowers, and will last for a week in water. The plants bloom for a long time, and by successional planting they can be had in bloom for three months. They prefer a fairly strong soil, well drained; the bulbs should be planted about six inches apart and covered about an inch.

Brunsvigia.

Multiflora 1s. each

This magnificent border plant forms a handsome crown of flowers on a stem of about three feet, containing from eighteen to twenty-four separate large blooms; the colours are pink and white, with a delightful perfume; will flower first season.

Crinum.

1s. 3d. each

A beautiful plant; its habit resembles the Agapanthus. The flowers are produced in bunches on tall stems, the leaves are also decidedly handsome.

White, with pink stripe. **Moorei.** Beautiful pink.

Freesia
Refracta Alba.

Single Hyacinths.

8d. each; 7s. per dozen.

RED, and Shades of Red.

Betsy. Red.
Cleopatra. Large spike, bells salmon blush, good.
Comet. Pale red, strong grower, fine spike.
Eldorado. Deep crimson.
Eliza. Dark red, good form, large spike.
Grand Blanche Imperial. Rich deep blush; large.
L'ami du Cœur. Beautiful bright rosy red.
Maria Cornelia. Light rose, early.
Monsieur de Faesch. Pink, fine.
Prosper Alpine. Dark red.
Robert Steiger. Bright crimson, large truss.

WHITE, and Shades of White.

Baroness von Tuyl. Large handsome truss, fine.
Grand Vainqueur. Pure white, good truss.
L'Innocence. Pure white.
Madame de Stael. Pure white.

BLUE, and Shades of Blue.

Cœur Blanc. Dark purplish blue, large white eye.
Emillus. Light clear blue.
Mimosa. Dark purple, very distinct, almost black.
William d'Erite. Purplish black, long spike, fine.

YELLOW, and Shades of Yellow.

Fleur d'or. Fine, pale.

Double Hyacinths.

8d. each; 7s. per dozen.

RED, and Shades of Red.

Grootvorst. Delicate blush, handsome bells.
Josephine. Pink.
Lady Montague. Dark Red.
Noble par Merite. Rose, striped carmine, large bells.
Princess Royal. Pink, Dark centre.

WHITE, and Shades of White.

A la Mode. Pretty blush white.
Bouquet Royal. Pure white.
Gloria Florum. Pure white, yellow centre.
Lady Wellington. Fine truss, good blush.
Prince of Waterloo. Pure white, large bells.

BLUE, and Shades of Blue.

Bouquet Pourpre. Dark blue, very fine.
Don Gratuit. Blue, good.
Konig von Wurtemberg. Deep strong blue; good.
La Belle Blanchiseuse. Blue.
Lord Noel. Blue.
Prince Albert. Black purple.

YELLOW, and Shades of Yellow.

Sovereign. Fine, good spike.

Hyacinth Glasses supplied for the purpose of growing and flowering Hyacinth Bulbs in water as a drawing-room ornament.

Various Colours, 9d. each, 6/- dozen.

BRASS HYACINTH SUPPORTS, 4d. each.

IN THE OPEN GARDEN. Hyacinths prefer a good sandy loam, enriched with old stable manure; peaty soils also suit them if well drained, or peat mixed with loamy or sandy soil grow them splendidly; do not succeed in dry soils. They should be planted in rows or in clumps 6 to 12 inches apart, and the crown of the bulb must be covered with at least an inch of soil. If the shoot when it comes through the ground shows an inclination to open and reveal the flower buds which it encloses, cover it up at once with an inverted flower pot, the object being to draw the flower stem from the bulb while it is enclosed in the leaves, and before the flower is exposed to the sun. If this is not done it sometimes happens that the flower begins to colour when only a portion of it has appeared, and the beauty of the spike is thus lost. Allow the flower pot to remain until the flower stem is well through and above ground, then remove it, and fine spikes will be secured. The bulbs must be lifted when they have done flowering and their foliage has died down.

HYACINTHS GROWN IN POTS are very beautiful. Plant in 6-inch pots, in rich loamy, sandy or peaty soil, well mixed; drain the pots well, place them in a shady or dark place until shoots appear above ground, and water sparingly, but when in full growth give a liberal allowance.

To GROW HYACINTHS in water to allow the base of the bulb barely to touch it, and place them in a dark cupboard for about three weeks, until the roots are well started and the shoot is at least half-an-inch long, then remove them by degrees to a well lighted position in the room near the window, and as close to the glass as possible. Renew the water once a week, and keep it filled up to the base of bulb only.

Hyacinths grown in water are most interesting and make lovely plants, spikes often 9 inches long; they are very easily grown and do well in this climate.

Roman Hyacinths. Early White.

Its pure white and deliciously scented flowers render this variety most attractive. It makes a very pretty show when grown in pots, the spikes are small but very pretty—4 or 5 in a 6-inch pot.

Hyacinthus Candicans. 6d. each.

Distinct species of Hyacinth, producing a long spike, 4 feet high, covered with white bell-shaped flowers.

Bedding Hyacinths.

4s. per dozen; 25s. per 100.

They are most suitable either for massing in beds or borders.

Gladioli Gandavensis.

Agatha. Rose, suffused lake, yellow spots.
Amalthee. Pure white, violet red blotch, tinted lilac.
Amerique. Cinnaber red, striped red brown.
Amiral Cervera. Slaty rose, striped slaty violet, white blotch.
Amitie. Fleshly rose, shaded straw colour, streaked purple.
Andre Leroy. Very fine deep cherry red, flamed and striped with a rich darker shade; white blotch and white stripe in the centre of each petal.
Angelique. White tinted flesh, blotch ivory white.
Arch. M. Christine. White, tinged lilac, flamed carmine.
Armagnac. Deep scarlet, banded white, striped velvety brown.
Bacchanti. Handsome salmon rose, streaked scarlet.
Baroness Burdett-Coutts. Delicate lilac, tinged rose; long spike of large flowers.
Berryer. Cherry red, edged lilac, white blotch.
Carmelite. Salmon rose, shaded with slate.
Carmen. Straw colour, streaked rose, citron rose at base of petals.
Carnation. Fine spike, fleshy white, tinged carmine, blotched purplish carmine.
Christopher Columbus. Rosy carmine, flamed red, large violet red blotch on lower petals.
Commandant Deloncle. Slaty red, violet blotch, white band.
Commandant Marchand. Compact spike, velvety dark ruby.
Cronstadt. White flowers, slightly flushed lilac.
Demosthene. Bright rose, streaked pure white, blotched violet carmine.
Diademe. Very fine, pale yellow, slightly edged rosy lilac.
Dorothee. Large flowers, fine lilac, flamed carmine, narrow red blotch.
Eldorado. Clear yellow, lower petals streaked red.
Eugene Scribe. Tender rose, blazed carmine red.
Fantome. Large pure white flowers, slightly streaked at edges with rosy lilac.

Hybrid Gladioli.

All varieties, **1s.** each; **10s.** per doz., post or carriage free.
FOR COLLECTIONS OF GLADIOLI SEE NEXT PAGE.

Our Magnificent Gladioli.

The Gladiolus is a charming flowering plant, which can be had in bloom for six months in the year, if frequent plantings are made, as the Bulbs can be kept in a dry state for a long period, and can safely be kept out of the ground if necessary, until they have a shoot of an inch in length. As cut flowers they are unrivalled, and last a long time in water, and if cut when only the first flowers are expanded, the remaining flowers will all open in water. The first planting should be made in May, followed by others right on until October, or later if bulbs are available.

We hold the Premier Collection in Australia of those lovely Plants, and are constantly improving it by importing many of the charming new varieties which are raised on the Continent from time to time.

Our window display of cut blooms—which lasts for nearly a month—still attracts crowds of admirers.

Gladioli Colvillei—"The Bride."

A Charming Gladiolus for cut blooms, for table decoration; the graceful spikes are very light and of the purest white, the foliage is also beautiful, and is a true miniature Gladioli. Price, 3d. each; 2s. 6d. doz.; 15s, 100

CULTURE OF GLADIOLI.

The culture of the Gladioli is exceedingly simple, as they will grow in any average soil; but to grow them to perfection the soil should be of a sandy or loamy nature, and should be well worked or trenched to a depth of 18 inches. No new or green manure should be used in preparing the soil, but old well-rotted stable manure, dug well in so that it does not touch any of the Bulbs, will greatly assist in keeping the ground in a moist open condition, and will promote a strong, hardy growth. A dressing of bone manure can, however, be incorporated with the soil with perfect safety. If planted in rows the bulbs should be 8 to 10 inches apart, and the rows two feet, and covered to a depth of 2 to 3 inches. When the shoots are about 12 inches high they should be tied up to keep them straight. The soil between the bulbs should be well stirred and kept clean. It will not be necessary to water them unless the season is a very dry one, if the ground has been well worked as we recommend, but if watering is resorted to let it be done thoroughly if less frequently. A top dressing of manure over the surface of the soil is an excellent practice in summer. After the plants have finished blooming and show signs of ripening, by their yellow and brown leaves, the bulbs should be lifted and the shoots cut off close to the bulbs; and when the bulbs are properly dried the old sole or bulb should be removed and the new bulbs stored in a dry place until ready for replanting.

Formosa. Perfect spike, satiny rose, striped carmine, creamy white blotch.
Gallieni. Immense flowers, intense cinnaber red.
Gargantua. Large flowers, rosy carmine, striped violet red, very bright in centre.
Grand Vainqueur. Tall spike, rose colour, flushed carmine.
Hebe. Delicate rose, striped, edged and flaked carmine.
Hercules. Velvety scarlet, streaked orange red, violet blotch.
Klondyke. Fine lemon colour, edges flamed blood red.
La France. Pure white, slightly flamed carmine towards edges, amaranth blotch.
La Parisienne. White ground, passing to yellow; flaked mauve.
La Perle. Splendid spike with large flowers, pure lilac, blotched violet carmine, on lower petals.
Lampadaire. Cherry red, suffused slaty brown, blotch white.
Leander. Lilac shading to carmine, distinct white band.
Lilley. Large flowers, mottled with creamy white and bright soft rose, very delicate.
MacKinley. Striped white and red on fleshy ground.
Madame Poiret. Coppery rose, slight golden blotch.
Magnificus. Cinnaber red, fine white blotch, edged violet.
Marguerite Cadeau. Almost pure white, lilac rose eye.
Michigan. Bright cherry red colour, white blotch.
Mme. Auber. Pale rosy lilac blotch, dappled light rose on some of the flowers.
Mr. Jansen. Large rosy carmine flowers, edged and streaked violet red, cream blotch.
Mrs. P. Palmer. Rose, suffused carmine, cream blotch, edge cherry red; very large flowers.
Murillo. Cherry rose on light ground, white blotch.

Choice Gladioli—Continued.

Gladioli Gandavensis—Continued.

- Neride.** Large flowers, pearl rose colour.
Neron. Beautiful dark red, suffused violet.
Nestor. Light yellow, striped red.
Norma. Pure white, sometimes suffused with lilac.
Pactole. Beautiful yellow, slightly tinged with rose at the edges; blotch of a darker shade.
Pepita. Golden yellow, edges of the petals slightly striped carmine towards the end of flowering season.
Phœbus. Brilliant red, with large pure white and very conspicuous blotch.
Prof. Sargent. Intense orange rose, suffused scarlet, faint amaranth blotch on bluish ground.
Rosalba. White ground, blotched with carmine, fine spike.
Sceptre de Flore. White throat, brightening to richest rose, spotted carmine.
Sultana. Satin rose, flamed carmine, purple carmine blotch.
Therese de Vilmorin. Flowers a creamy white, passing into pure white, few purplish rose stripes in centre.
Thermidor. Salmon red, flushed and edged slaty grey.
Titania. Beautiful tall spike, creamy salmon, flamed cherry.
Tournesfort. Fine spike, flowers carmine red, streaked violet.

Gladioli Nanceianus.

- Alsace Lorraine.** Crimson, pencilled red on lower petals.
Abbe Roucourt. Large flower, crimson, pencilled blood red.
A. R. Smith. Carmine red, pencilled with purple and straw colour.
Eugene Rambert. Slaty-violet, marbled violet-red, blotch narrow.
Ferdinand Kegelljan. Orange-red, flamed salmon rose, blotched and pencilled straw colour.
G. A. Kuyk. Carmine red, blotched and pencilled purple on white ground.
General de Boisdeffre. Flowers slaty rose, blotched red, pencilled straw colour.
Georges Frick. Crimson red, blotched brown, pencilled white.
Pacha. Orange-red, striped red on sulphur ground.
President Carnot. Cherry-red, fiery scarlet blotch on gold pencilled ground.

Gladioli Lemoinei.

- Achanti.** Dark red-brown, very rich.
Armenien. Pale lilac, violet blotch.
Commandant Monteil. Slaty violet, narrow blotch.
Comte de Kerchove. Large, rose colour, bright purplish blotches, white stain.
Domino Rose. Pale cherry-red, blotch straw colour.
Eldorado. Pure yellow, blotch dark.
Ethiopie. Deep violetish red, dark velvety blotch.
Lacordaire. Fiery vermilion; early.
Madrilene. Bright salmon rose, carmine blotch on white ground.
Mad. Desboides Volmaire. Large salmomy white flowers, large scarlet blotches and edged straw.
Marceau. Salmon yellow, blotched cinnabar red, edged yellow.
Mephistopheles. Deep red, blotched black and sulphur; unique.
Mireille. White, suffused rose on edge of petals.
Mons. Jarry-Desloges. Perfect shape, splendid fiery scarlet, small purplish blotches.
Mons. Leveque. Splendid velvety crimson, lined golden yellow.
Prof. Le Monnier. Orange scarlet, large dark blotches, edged gold.
Senateur Volland. Large flowers, pure blue, dark blotch with a yellow stain; striped blue.
Tomboucton. Deep purplish blue.
Tricolore. Creamy rose, suffused lilac, blotch dark violet.

Gladioli in Splendid Mixture..

This assortment includes many superb varieties and shades of colour, and every bulb will produce a flower worth looking at, and every collection, whether large or small, will include a great variety. All these bulbs are from our celebrated collection.

5/- per dozen; 35/- per 100.

Gladioli in Collections.

ALL SHADES AND COLOURS.

Collections of Bulbs.

WE HAVE INCREASED THE NUMBER
OF COLLECTIONS, AND WE
OFFER A FINE LIST ON
PAGE 12 and
INSIDE BACK
COVER.

Nothing can exceed the beauty of this charming family of plants, remarkable alike for their curiously constructed and quaintly marked flowers, and for the peculiar manner in which the colours are blended; they are easily cultivated. Plant from March to May.

Spanish Iris (Orchid Iris).

We have grown these extensively during the past season, and can most strongly recommend them as decorative plants. The flowers are produced on slender stems about a foot high, bearing two or three flowers each. These are most fantastically shaped and of beautiful colours, yellow, bronze and blue, with beautiful shades and markings. A single bulb will sometimes throw three or four spikes, and these when cut will last a long time in water, as the buds continue to open. As a dinner table decoration they cannot be excelled. They will thrive in the open or partially shaded places, and should be planted in clumps. Any average soil will grow them, provided it is well drained. In soil inclined to be stiff put some sand around the bulbs when planting.

Avalanche. White, golden blotch.
British Queen. Large, pure white.
Belle Chinoise. Pure yellow.
Beauty. Bronze.
Clarisse. White, violet, and yellow.
Chrysolora. Yellow.
Canton. Dark blue.
Emperor of the West. Dark blue.
Fenelon. Light blue and yellow.

Glaser. Dark blue.
Louisa. French grey, golden blotch.
Midley. Blue, large fine flower.
Novelty. Pure white and yellow.
Non Plus Ultra. Light blue.
Princess Ida. Primrose and white.
Queen Emma. Yellow.
Queen Wilhelmina. Pure white.
Von Humboldt. Sky blue and white.

Collection of the above 18 lovely varieties, named and distinct, 4s. 6d.

Should any of these varieties be sold out, we will substitute other equally good sorts.

Splendid Mixture, all shades .. 3s. per doz.

German Iris.

6s. doz.

An exceedingly large, handsome variety. They succeed best in moist situations, as it is very necessary that they have a free supply of water during the blooming season.

Iris Kaempferi (Japanese Flag Iris).

1s. each; 9s. per dozen.

For size and richness of colour the following varieties of the Japanese Iris are unequalled, with an undescribable mass of colouring, flowers often measuring 6 to 8 inches across. They grow to a height of 2 feet, and must have a moist situation, with light rich soil, and swampy land will grow them well.

Large Maroon.
Dark Blue.
Large Blue and variegated.
Light Maroon.
Light Blue.
Double Violet.

Brilliant Purple, yellow blotches.
Tyrian Blue, feathered white.
Navy Blue, yellow blotches.
White, primrose blotches.
Sky Blue, primrose blotches.

Lavender and White, yellow blotches.

Montbretias.

3s. doz.

Crocsmæflora. Distinct varieties. Extremely hardy free growing plants, which flower profusely when thoroughly established. The flower stems are from 2½ to 3 feet in height and gracefully arched, and the colours are charming—bright orange, golden yellow, orange and bright vermillion, striped vermillion, and rose. They grow well in any soil.

Iris Pavonia

(Peacock Iris).

3d. each; 2s. 6d. doz.

A beautiful variety, supporting on slender stems lilac coloured flowers with an intense blue spot on each petal.

Iris Susiana

(The Mourning Iris).

1s. each.

A distinct and most beautiful variety, flowers large, with winged petals surrounding those enclosing the centre of the flower. Ground colour pale grey, lined and veined with dark brown, resembling tracery of the finest lace. It has been named the "Mourning Iris" because of its sombre colour, but to many that only adds to the charm of its beauty.

Iris Iberica.

1s. each.

A beautiful variety of a pale lilac colour; the falling petals are closely veined like Iris Susiana.

Iris Spanish.

Muscaria (Grape Hyacinth).

3d. each; 2s. doz.

Pretty bluish violet and white flowering bulbous plants, dwarf and free flowering.

Montbretias.

SPECIAL COLLECTION OF LILIES.

LILIES. The beauty of form, the chaste delicacy of the white blooming varieties *Harrisi*, *Candidum* and *Longiflorum*, and the magnificent colours of *Auratum*, and *Speciosum*, render these of the greatest importance as Summer blooming plants. They will grow in any good garden soil, provided it is well broken up and drained, but they delight in light, fibrous, peaty soil when it is obtainable. By planting the proper varieties, a display can be obtained all through the summer.

ALL OUR BULBS ARE
POST FREE
AT PRICES NAMED.

**Lilium
Harrisi.**

Ixia.

A charming family of hardy flowering plants; flowers are scarlet, lavender, white or green, on light graceful stems, produced in great profusion. Any light soil will grow them; they should be planted in clumps, or in rows four inches apart.

Viridiflora. Green flowered Ixia, one of the few flowers of this colour; a charming variety. Stock limited, 2s. per doz.

Scarlet. Most brilliant colour; charming flower	1s. 6d. per doz.
Yellow. Beautiful shade of yellow, dark throat	8s. 6d. per 100.
White. Fine pure white	75s. per 1000.
Mixed. All colours	
Named varieties. A splendid assortment ..	3s. 6d. per doz.

Jonquil.

Much admired for their beauty and delicious fragrance; they bloom very early, and last a long time; flowers much smaller than the Daffodils.

Single. Yellow ..	1s. 6d. per doz.
Double. Yellow ..	2s. 6d. per doz.
Camperelli ..	2s per doz.

Liliums.

Harrisi (True Easter Lily). A most lovely pure white Lily, with long graceful tube-shaped flowers produced in profusion on the crest of an upright stem. Without doubt the finest trumpet Lily

Lily ..	1s. each
Longiflorum. Pure white; dwarf; long tube ..	6d. each
Candidum (Single White Lily). Very fragrant ..	9d. each
Croceum (The Orange Lily). Orange and black ..	9d. each
Lancifolium Album. Pure white, recurved ..	9d. each
Lancifolium Roseum. White, spotted rose, flowers recurved ..	9d. each
Lancifolium Rubrum. White, spotted red, flowers recurved ..	9d. each
Pardalinum. Scarlet, shading to yellow, spotted purple and brown; very handsome ..	9d. each
Auratum (Golden Rayed Lily of Japan). Flowers from eight to ten inches across; ivory white, thickly studded with crimson spots, and a bright golden band through centre of petal ..	1s. 6d. each
Tigrinum (Tiger Lily). Orange, spotted black ..	6d. each
Tigrinum Flore Pleno (Double Tiger Lily) ..	9d. each

Lachenalia.

Aurea. Golden ..	6d. each
Quadriflorum ..	6d. each

Very free flowering; flowers yellow margined with green, red and orange; spotted leaves.

Nerine.

Sarniensis (Guernsey Lily), 1s. each.
Belongs to the Amaryllis tribe; thrives well in the open ground; flowers a pale salmon colour.

Japonica (The Beautiful Japanese Spider Plant) 6d. each; 4s. per doz.

In September, after the leaves have withered, it sends up flower stalks nine to twelve inches high which are crowned with umbels of bright red flowers with long curved stamens; charming.

copies of our Catalogues.**

Date 1905

ALTHOUGH in Australia there is no such long winter rest for bulbous plants as in England and the Continent, nevertheless these charming plants, which mark the advent of Spring in the old country, have their short rest here, but as soon as the approach of Spring is heralded by the sunshine and warm days the Daffodil wakes into new life, and soon puts forth its bright flowers in all their loveliness to deck our gardens and our homes, and mark the Springtime with their bright beauty just as effectively in Australia as they do in England.

There is no more easily cultivated flowering bulb, for although the Daffodil prefers a strong loam, it will grow and flower freely in any average garden soil. The land should be well worked and deeply dug, but if it is very poor, well-rotted horse manure should be dug in, to a depth of 8 to 12 inches so that it does not touch the bulbs. Bone manure can be incorporated with the soil to advantage. We offer strong bulbs which will flower the first season. These should

be planted 6 inches apart, and the crown of the bulb should not be covered more than 2 inches. The flowers keep a long time when cut, and retain their brilliant colours in water for several days.

LEEDSII OR DAFFODILS

Incomparabilis or Chalice Cupped Daffodils.

- Autocrat.** Very handsome flower; full self yellow. 3d. each; 2s. 6d. doz.
Beauty. Red cup. 6d. each; 5s. doz; 30s. 100.

Polyanthus Narcissus.
"Grand Monarque."

Anderson & Co., Seedsmen, and Plant and Bulb Merchants, Sydney.

Ranunculus (Turban).

Snowflake (Leucojum Aestivum).

Snowflake. A beautiful hardy bulb of the Snowdrop type, which it strongly resembles; the petals are prettily tipped with green; it does well in almost any soil or situation; height when in flower about 12 inches 6d. doz.; 3s. 6d. 100

Giant Snowflake. A vast improvement on the ordinary variety, each bell being double the size of the old Snowflake; height when in flower about 12 inches 4d. each; 3s. doz.

Sprekelia Formosissima (Jacobean Lily).

See Amaryllis.

Tigridia.

Pavonia. The Tiger Flower, so called from the peculiar markings of its beautiful single crimson flowers, which are spotted with yellow; it is very hardy; height 10 to 12 inches 4s. doz.

Canariensis. Yellow, scarlet spots 6d. each

Conchiflora. Yellow and red spotted 6d. each

Grandiflora Alba. (White Tiger Flower); white, spotted crimson; large 9d. each

Tuberoze.

One of the most beautiful summer flowering bulbs in cultivation; the blooms are of the purest white and of the most exquisite fragrance; they are admirably adapted for bouquet making, and are easy to cultivate; flower stems 3 to 4 feet. Any good garden soil will grow them.

Double Dwarf "The Pearl" 6d. small clumps; 1s. large clumps

Double 6d. small clumps; 1s. large clumps

Single 6d. small clumps; 1s. large clumps

Calla.

Æthiopica (Arum Lily). The Old Nile Lily 6d. each

Maculata Alba. Spotted leaves, white flowers, makes a pretty pot plant 1s. each

Ornithogalum Arabicum.

Star of Bethlehem. A strong growing showy plant, with large bunches of flowers produced on a tall stem; colour white with dark centre; very hardy 3d. each; 2s. doz.

Polygonatum (Solomon's Seal).

A graceful plant, having arching stems of pendant white flowers, partly hidden beneath its foliage 6d. each

Pancratium.

Beautiful pure white flowers, exceedingly fragrant. Liberal supplies of water should be given during the growing season 1s. each

Ranunculus.

We very strongly recommend the beautiful Ranunculus as one of the most charming of our spring flowering plants; the flowers are very double, and sometimes four inches across; a bed of them in full bloom is a glowing mass of colour. They prefer rich loamy soil, but will grow in any average land, if well enriched; they should be planted at least six inches apart, and the ground made firm about them. The bulbs are planted claws downwards.

Turban Scarlet 1s. per doz.; 5s. per 100

Turban Yellow 1s. per doz.; 5s. per 100

Turban Grandiflora. Fine crimson and yellow 1s. per doz.; 5s. per 100

Turban White 1s. 6d. per doz.; 7s. per 100

Turban Black 1s. per doz.; 5s. per 100

Turban d'or. Scarlet and gold 1s. per doz.; 5s. per 100

Turban Mixed 1s. per doz.; 5s. per 100

Prince de Gallitzin. Superb spotted; very distinct 1s. per doz.; 5s. per 100

Double French. Splendid colours 1s. per doz.; 4s. per 100

Persian Mixed. Very fine 1s. 6d. per doz.; 7s. 6d. per 100

Persian Finest Named Varieties. In distinct colours 2s. per doz.

Finest Scotch. Spotted varieties, mixed 1s. per doz.; 5s. per 100

Scilla.

Wood Hyacinth. A beautiful little spring blooming bulb; will succeed in almost any situation, being perfectly hardy; flowers are of various colours, principally blue shades, and are produced on a short stem; some of the varieties are very dwarf and exquisitely beautiful 3d. each; 2s. doz.

FOR
COLLECTIONS OF BULBS,
SEE PAGE 12 and
INSIDE BACK COVER.

This genus of old favourite flowers can be grown in parts of our State with great success, and flowered the first season after planting. They prefer a rich sandy loam, but any ordinary land can be enriched by the addition of plenty of old stable manure to grow them successfully; if the soil is inclined to be stiff the addition of sand would be serviceable. The cooler districts of our

State will grow them admirably, but they will do fairly well in other parts if a cool or shady position is selected and plenty of water given, should the weather be dry during the growing season.

Single. Very fine mixed		2s. 6d. doz.
Double. Very fine mixed		3s. per doz.

Sparaxis.

Mixed. Embracing every shade and beautifully marked; for their refined colour and graceful habit Sparaxis never fail to win admiration; they are of easy culture; dwarf, six inches 2d. each; 1s. 6d. doz.

Pulcherrima (Dierama). Very beautiful species, known as "Fairy Bells"; produces stems 3 to 4 feet long, with pendulous, bell-shaped flowers, quite distinct from the ordinary Sparaxis 6d. each

Watsonia O'Brieni Alba.

Tulip.

Splendid Specimens!

"The Bulbs arrived in good order, and are splendid specimens."—H. S. WEBB, Ararat, Victoria.—16-4-04.

Tritonia.

Longiflora. A very useful decorative flower, allied to the Ixias, of a rich salmon colour; distinct 2d. each; 1s. 6d. doz.

Mixed. From named sorts. Exceedingly free flowering and bright; quite hardy and easily cultivated 2d. each; 1s. 6d. doz.

Vallotta Purpurea

(The Scarborough Lily). A lovely free-flowering bulb of the Amaryllis family, suitable either for pots or borders; the flower is trumpet-shaped, produced in clusters, and of a rich orange scarlet; spikes, 18 inches 1s. 6d. each

Watsonia.

O'Brieni Alba. Lovely pure white 4d. each; 3s. doz.

Rosca. A beautiful shade of rosy red 4d. each; 3s. per doz.

Dry Bulbs can be supplied up to the end of June, and during July and August in pots.

O'Brieni Alba is a magnificent plant; when in flower it is from 5 feet in height, and throws up enormous spikes, and produces side shoots which flower in succession for a month or six weeks. Suitable for cutting.
